

Samriddhi Khare

Philadelphia, PA | 215-397-8111 | samriddhikhare8@gmail.com

Planner and data analyst with 4+ years of consulting experience. Excels in producing useful, data-backed insights to support transit planning, grant competitiveness, and infrastructure policy. Experienced in managing interdisciplinary coordination for municipal and regional agencies. Advocate for innovation and equity in planning and transit.

Experience

Mar 2026 – Present

Consulting Researcher, Penn Praxis | Philadelphia, PA

Project: Smart Loading Zone Demand Modelling (Traffic Modelling and Analysis, Data Visualisation, Site Planning)

- Modelled demand for sensor-enabled Smart Loading Zones using traffic, land use, and curb specification data to identify sites for implementation.
- *Project: PHILA250 Asset Mapping and Research (GIS, Research, Public Engagement)*
- Led the production of public-facing printed and interactive maps of historical assets for community engagement using ArcGIS Pro, ArcGIS Online, and StoryMaps.
- Managed end-to-end community outreach and first-hand data collection through analytical fieldwork and surveys.

Aug 2024 – Feb 2026

Data Analyst, Econsult Solutions | Philadelphia, PA

Skills: GIS, Spatial Research and Analysis, Economic Modeling, Adobe, Writing

- Led development of machine learning models in Python and R to estimate socio-economic impacts of transit projects, housing, and urban green infrastructure supporting over 30 local and nationwide agencies.
- Independently managed production of GIS deliverables for my team in ArcGIS and Adobe, creating visual products for public and commercial clients.
- Spearheaded firm-wide integration of ArcGIS StoryMaps, GIS in Power BI, and Adobe Creative Suite, to make spatial analyses deliverables accessible to wider audiences, improving firm capabilities and project acquisitions.

Project: Multimodal Transportation Analysis and Planning (Excel, ArcGIS, R)

- Developed an Excel input-based tool to model financial scenarios (visually comparing ROI, IRR, and NOI trends) for construction projects and business operations, informing process improvement and investment decision-making.
- Authored and designed memos and reports for city, state, and transit leadership to inform regional and institutional policy.

Project: Fiscal Analysis of Housing Dashboard (Power BI, R, Python, Excel)

- Designed a Power BI dashboard to communicate analyzed housing construction impacts, integrating datasets on assessed value, municipal expenditures, and tax base demographics, for technical and non-technical audiences.
- Modelled regression analyses to quantify the marginal impact of housing density across 145 municipalities and 8 housing types.

Oct 2021 – Jan 2022

Consultant, Studio Sakha | Nagpur, India

- Analyzed raster data in ArcGIS and Python for an airport expansion site plan.
- Presented data for feedback to over 100 domain experts, government agencies and litigation/press.

Education

Dean List Graduate,
2024

Master of City Planning, University of Pennsylvania

Coursework: GIS, Spatial Analysis, Urban Economics, Transportation Planning & Analyses

Graduate, 2022

Bachelor of Architecture, Visvesvaraya National Institute of Technology

Skills

Software:

ArcGIS, R, Python, SQL, Power BI, VISSIM, MS Suite (Advanced Excel Capabilities), Adobe

Skills:

Economic Research and Modeling, Spatial & Statistical Analysis, GIS, Research Writing
