

Samriddhi Khare

Philadelphia, PA | 215-397-8111 | samriddhikhare8@gmail.com

Planner and data analyst with 4+ years of consulting experience. Excels in producing useful, data-backed insights to support transit planning, grant competitiveness, and infrastructure policy. Experienced in managing interdisciplinary coordination for municipal and regional agencies. Advocate for innovation and equity in planning and transit.

Experience

Mar 2026 – Present

Consulting Researcher, Penn Praxis | Philadelphia, PA

PHILA250 Asset Mapping and Research (JavaScript, GIS, Community Engagement)

- Developed and maintained interactive planning websites using JavaScript, HTML/CSS, and WordPress, building custom field integrations and responsive user interactions.
- Led the production of public-facing printed and interactive maps of civic assets using Python and ArcGIS. (leaflet, ArcGIS StoryMaps)
- Managed end-to-end community outreach and data collection from local businesses and organizations through fieldwork/surveys, publishing findings as open-source resources.

June 2023 – Feb 2026

Data Analyst, Econsult Solutions | Philadelphia, PA

Model Building, Urban Analysis and Research, Planning and Transportation, Writing

- Led development of reproducible machine learning models in Python and R to estimate socioeconomic impacts of transit projects, housing, and urban green infrastructure supporting over 30 local and nationwide agencies.
- Independently managed production of GIS models and deliverables for all projects.
- Increased firm project acquisitions by introducing dashboard design and Adobe Creative Suite, making spatial analyses accessible to non-technical audiences.

Transportation Analysis and Planning (Excel, Python, Urban Green Infra)

- Built a scenario modeling tool to prioritize green infrastructure investments by comparing return on investment, internal rate of return, and net operating income across multimillion-dollar capital projects and operating scenarios.
- Partnered with engineering, design, and accounting teams to define environmental priorities, publicly present findings, and embed data-driven decision-making into state and municipal planning.

Fiscal Analysis of Housing Dashboard (Power BI, R, Python, Excel)

- Designed a Power BI dashboard to communicate analyzed housing construction impacts, integrating datasets on assessed value, municipal expenditures, and tax base demographics, for technical and non-technical audiences.
- Modelled regression analyses to quantify the marginal impact of housing density across 145 municipalities and 8 housing types.
- Authored and designed memos and reports for city leadership to inform regional policy.

Oct 2021 – Oct 2022

Consultant, Studio Sakha | Nagpur, India

Airport Site Suitability Analysis (Raster Analysis, Python, Media and Publication)

- Analyzed raster data in Python using ArcGIS for an airport expansion site plan comparing NDVI/LST deltas and transportation infrastructure.
- Presented data for feedback to over 100 domain experts, government agencies, and litigation/press.

Education

Dean List Graduate,
2024

Master of City Planning, University of Pennsylvania

Planning Methods, Data Science, Transportation Planning, Climate and Policy Analyses

Graduate, 2022

Bachelor of Architecture, Visvesvaraya National Institute of Technology

Skills

Software:

ArcGIS, R, Python, SQL, Power BI, Synchro, MS Suite (Advanced Excel Capabilities), Adobe

Skills:

Economic Research and Modeling, Spatial & Statistical Analysis, GIS, Research Writing
